

Banque Pictet, Geneva 

GENERAL INFORMATION

Work site:
Pictet Group
Route des Acacias 60
1211 Genève

Period of execution:
Work carried out in 2 phases
Phase 1 – August to October 2021
Phase 2 – April to May 2022

Contact person: Yann Pugin

PROJECT DESCRIPTION

To pursue the development of its activities, the Pictet Group has decided to construct an avant-garde building at the heart of the major Praille Acacias Vernets urban development project in Geneva.

The new building will play a central role in the future Campus Pictet de Rochemont. Equipped with the most modern technologies, it will also represent a model of environmental integration in an urban environment.

The Campus Pictet de Rochemont aims to become one of the most emblematic building complexes of the Praille Acacias Vernets (PAV) project. Located at the heart of Geneva, the PAV is a dynamic area combining industrial, commercial and residential complexes.

Campus Pictet de Rochemont is scheduled to open in 2025.

Some figures: 54,000 m² of office space – 2,500 workplaces

PROJECT PARTICIPANTS

Project owner:

Pictet Group
Route des Acacias 60
1211 Genève

Engineering office:

BG Ingénieurs Conseils SA
Avenue de Cour 61
1001 Lausanne

Drilling company:

Orlati Géothermie SA
Route de Bettens 13
1042 Bioley-Orjulaz

GEOHERMAL SENSORS

For this project, the project owner has entrusted Orlati Géothermie SA for the drilling part and was convinced by the exceptional technology of the HakaGerodur SA geothermal sensors, **GEROthem FLUX**. A total of 99 boreholes were drilled to 360 m.
Phase 1 = 47 boreholes to 360 m / Phase 2 = 52 boreholes to

CONNECTION PIPES

The "horizontal" connection pipes allow the geothermal sensors to be connected to the collectors and are made of HakaGerodur SA, GEROthem PE 100-RC, 50 mm, PN16 piping.
